

# 2011 Connected Health Symposium

## Sponsors & Exhibitors

AirStrip Technologies™ is a healthcare information technology company that has developed a revolutionary software solution for mobile patient monitoring. AirStrip has built and deployed an FDA-cleared platform which allows patient information - including waveforms, and other critical data from EMRs, bedside monitors and devices, pharmacy, lab, and other clinical information systems - to be securely and natively accessed by clinicians on their smart phones or tablets...anytime, and anywhere.

AFC Industries is a leading manufacturer of innovative ergonomic carts, wall mounts and medical furniture. AFC collaborated with leading physicians and clinicians in designing unique ergonomic solutions for the medical work environment. AFC offers electrically adjustable work-surfaces, monitors as well as wall mount solutions. AFC solutions are US made.

Alcatel-Lucent "Connected Hospital" solution provides better patient experiences, improved caregiver efficiency, enhanced "always on" healthcare systems and drives seamless hospital automation. Alcatel-Lucent "Connected Hospital" solution provides better patient experiences, improved caregiver efficiency, and drives seamless hospital automation. For more information about Alcatel-Lucent, visit: [www.alcatel-lucent.com/healthcare](http://www.alcatel-lucent.com/healthcare)

The American Telemedicine Association is the leading international resource and advocate promoting the use of advanced remote medical technologies. ATA and its diverse membership, works to fully integrate telemedicine into transformed healthcare systems to improve quality, equity and affordability of healthcare throughout the world.

American Well™ has created an Online Care system that allows consumers to connect with physicians immediately, whenever they have a health need, from their homes or offices. The innovation uses advanced Web-based technologies and telephony to remove traditional barriers to healthcare access, including insurance coverage, geography, mobility and time constraints. American Well is committed to supporting health plans in meeting consumer and employer demand for affordable, efficient and immediate access to quality care. For more information, please visit [www.americanwell.com](http://www.americanwell.com).

Anakena Solutions ([www.anakenasolutions.com](http://www.anakenasolutions.com)) solves the most difficult and complex technology problems in Health IT. We are currently providing software, interoperability tools, and the regulatory strategy for the HHS ONC MD SHARP research program, a project funded by the NIH. The final product will be an open platform and tools to enable clinical application development for interoperable medical devices.

ANT™ and the interoperability of ANT+ continue to lead the sport, fitness and consumer health sectors with practical and reliable monitoring solutions. With an install base of over 16M, the ANT+ established ecosystem encompasses weight scales, blood pressure, heart rate, activity, and continuous glucose measurement, plus multiple sport and cardio apps.

AT&T is the next-generation communications provider with the proven infrastructure, global breath, financial resources and commitment to meaningful innovation to be a stable long-term partner for all segments of the healthcare field.

Avaya is a global leader in enterprise communications systems, and provides unified communications, contact centers, data solutions, and services directly and through channel partners to leading businesses around the world. Enterprises depend on Avaya for state-of-the-art communications that improve efficiency, collaboration, customer service and competitiveness. For information please visit [www.avaya.com](http://www.avaya.com).

Blue Highway LLC exists to innovate—and that means capitalizing on breakthrough invention. We collaborate with academic researchers, industry and government to create innovative, intellectual capital. Our focus is predominantly the future of diagnostic healthcare—the early detection, diagnosis and aggregation of data for comprehensive clinical support. [www.bluehighway.com](http://www.bluehighway.com)

Robert Bosch Healthcare, part of Bosch Group, is a market leader in telehealth solutions that promote patient-self management and clinical care coordination for individuals with chronic conditions. We offer easy-to-use, flexible, home-based remote patient monitoring telehealth systems that are proven to improve patient outcomes and reduce healthcare costs. Our solutions are designed to serve individuals with a wide range of chronic conditions. We are experienced in large-scale deployments with partners such as the US Department of Veterans Affairs and Medicare.

C4U Technologies provides web-based communication solutions to the healthcare sector. Our patient portal consists of a series of modules that can easily be molded to meet the needs of large and small health care organisations. Our healthcare portal offers a complete personal overview of your health and welfare.

CALIFORNIA  
HEALTHCARE  
FOUNDATION

The California HealthCare Foundation works as a catalyst to fulfill the promise of better health care for all Californians. We support ideas and innovations that improve quality, increase efficiency, and lower the costs of care.

Cardiocom®, Experts in TelehealthSM, is an integrated clinical telehealth services leader. Cardiocom provides cost-effective telemonitoring solutions for complex chronic conditions including heart failure, diabetes, hypertension, COPD, asthma, CKD and ESRD. Cardiocom's telehealth systems decrease hospital readmissions, improve patient outcomes and quality of care. Cardiocom's clients include some of the most respected hospitals, physician groups, home health agencies, managed care organizations and coordinated care companies in the nation. Cardiocom is the recipient of the 2011 Frost & Sullivan North American Remote Patient Monitoring Enabling Technology of the Year Award.

Continua®  
HEALTH ALLIANCE

Continua Health Alliance is an international, not-for-profit industry alliance dedicated to establishing a system of interoperable personal connected health solutions that fosters independence and empowers people and organizations to better manage health and wellness. With more than 240 member companies around the world, Continua is enabling a marketplace of interoperable devices that enable better care, empower consumers and connect healthcare providers to their patients. The Alliance focuses on three key domains: Health and Wellness, Condition Management, and Living Independently.

The Coalition to Transform Advanced Care (C-TAC) is a national, nonprofit, non-partisan alliance of patient and consumer advocacy groups, health care professionals and providers, private sector stakeholders, faith-based organizations, and health care payers with the shared mission to help provide all Americans, especially the sickest and most vulnerable, with comprehensive, high quality, patient-centered care that is consistent with their goals and values and honors their dignity.
